

## FOR OUTDOOR VENUES

Coordinators should look at venue, complete risk assessment and forward it to the Safety Management Team at least 2 weeks before the activity

Activity:		Venue:		
Coordinator:	Email:		Phone:	Date:

Activities will be conducted in accordance with this risk assessment, implementing the control measures outlined below.

Brief description of venue		

Hazards, including but not limited to -	Description of hazards - put cross in the box of those that apply	Risk level before control	Control measures- put cross in the box of those that apply	Risk level after control
Biological (e.g. hygie	ne, disease, infection)			1
Virus/disease Food handling	[] Covid and other viruses [] Food handling		<ul> <li>[] Follow Covid Safe Plan</li> <li>[] Wear masks if required bu Qld Health</li> <li>[] Bring your own chair and other personal items</li> <li>[] Do not share equipment</li> <li>[] Do not share food and drinks</li> </ul>	
Critical incident – res	sulting in:	1	1	I
Lockdown Evacuation Disruption	[] Evacuation		<ul> <li>[] Plan for emergency medical assistance. Check mobile phone reception is available. Phone 000 in case of emergency</li> <li>[] Have ICE installed on mobile or provide coordinator with next of kin details</li> </ul>	
Environment	·			
Sun exposure Temperature Animals/insects Weather – wet/dry	<ul> <li>[] Sunburn</li> <li>[] Heat stress</li> <li>[] Bee stings, insect bites, snake bites</li> <li>[] Swooping magpies</li> </ul>		<ol> <li>Apply sunscreen and insect repellent.</li> <li>Wear a hat, long pants and shirt with long sleeves, closed in shoes, carry water</li> <li>People with allergies bring own Epipen.</li> <li>Keep a lookout for snakes.</li> <li>Carry First aid kit with snake bite kit and instructions for treating snake bite.</li> </ol>	

Hazards, including but not limited to -	Description of hazards - put cross in the box of those that apply	Risk level before control	Control measures- put cross in the box of those that apply	Risk level after control
Environment (contin	ued)			
Paths, trails, ground surfaces	<ul><li>[ ] Trips, slips and falls</li><li>[ ] Other – give details</li></ul>		[] Watch for uneven ground. Walk on paths if possible. Note any protruding hazards. Wear suitable footwear.	
Vehicles		<u> </u>		<u> </u>
Vehicles	[ ] Injury in car park		[] Watch out for moving vehicles in car park or on the street. Take care to look for pedestrians when reversing	
Manual tasks/ergono	mics			<u> </u>
Manual tasks	[ ] Injury while relocating of furniture		[ ] Any furniture should be moved by two or more able-bodied persons	
Other hazards – give	details:	I		I

Likelihood	Description of likelihood
5. Almost certain	Almost certain to occur within the foreseeable future
4. Likely	Likely to occur within the foreseeable future.
3. Possible	May occur within the foreseeable future.
2. Unlikely	Not likely to occur within the foreseeable future.
1. Rare	Will occur only in exceptional circumstances.

Consequence	Description of consequence
A. Insignificant	No treatment required.
B. Minor	Minor injury requiring first aid treatment (e.g. minor cuts, bruises, bumps).
C. Moderate	Injury requiring medical treatment.
D. Major	Serious injury (injuries) requiring specialist medical treatment or hospitalisation.
E. Critical	Loss of life, permanent disability or multiple serious injuries.

Risk Assessment Matrix					
Likelihood	Consequence				
Likelinood	A.Insignificant	B.Minor	C.Moderate	D.Major	E.Critical
5. Almost certain	Medium	Medium	High	Extreme	Extreme
4. Likely	Low	Medium	High	High	Extreme
3.Possible	Low	Medium	Medium	High	High
2.Unlikely	Low	Low	Medium	Medium	High
1.Rare	Low	Low	Low	Low	Medium

Assesse	d risk level	Description of risk level	Actions	
	Low If an incident were to occur, there would be little likelihood that an injury would result.		Undertake the activity with the existing controls in place.	
	Medium	If an incident were to occur, there would be some chance that an injury requiring first aid would result.	Additional controls may be needed.	
	High If an incident were to occur, it would be likely that an injury requiring medical treatment would result.		Controls will need to be in place before the activity is undertaken.	
	Extreme	If an incident were to occur, it would be likely that a permanent, debilitating injury or death would result.	Consider alternatives to doing the activity. Significant control measures will need to be implemented to ensure safety.	

	Hierarchy of controls				
Most effective (High level)	Elimination: remove the hazard completely from the area or activity.				
	Substitution: replace a hazard with a less dangerous one.				
	Redesign: changing equipment or process to make it safer.				
	Isolation: separate people from the source of the hazard.				
Least effective Administration: putting rules, signage or training in place to make an area or activity safer.					
(Low level)	Personal protective equipment (PPE): protective clothing and equipment.
